

# RTM Consulting

## Professional Services Automation (PSA) / Project Portfolio Management (PPM) Practice

**Our mission is to help consulting, professional and shared services organizations get better at what they do**

### **The Challenge**

As a Professional Services or Project Management executive you need comprehensive and integrated information to manage your business. At the same time, you have tens, hundreds, if not thousands of resources out working on critical client related projects. You need a cost effective mechanism to garner the information you need – without over burdening your client facing resources.

### **The Solution**

Every business transformation project involves a ‘lifecycle’ of effort, from defining requirements to making the solution work effectively and efficiently for your operation. RTM Consulting brings decades of experience and a proven framework for the PSA/PPM buyer to help you make the best buying decision, implement your choice of tool(s) successfully and maximize your ROI.

### **Who We Are**

Specializing in Global Resource Management, Project and Portfolio Management and Services Business Optimization, RTM Consulting can help your business run more effectively and efficiently while leveraging the strategic benefits of a services portfolio.

### **PSA / PPM Practice**

Historically, many organizations have pieced together a combination of financial packages, homegrown applications and project management tools. In other instances, spreadsheets are used as the “tool” of choice. Over the past decade, a number of software providers have developed comprehensive packages to address both the company and project related requirements of a Consulting or Professional Services organization.

RTM Consulting’s PSA/PPM Practice provides a full lifecycle of consulting services to define requirements, select and support implementation of the appropriate enabling technology and align operational processes and user adoption with the technology to achieve maximum benefit in the shortest period of time.

RTM Consulting works with its clients on:

- ▶ **Automation Needs and Requirements Assessment**
- ▶ **Automation Business Case Development**
- ▶ **Process Re-Engineering**
- ▶ **Automation Tool Use Optimization (deployment of processes)**
- ▶ **Implementation Support**
- ▶ **Business and Technical Architectures**

RTM Consulting’s position in the professional services industry provides an extensive experience base with a wide variety of PSA/PPM tools – as well as an objective third party assessment of what is right for your business.
