The RTM Consulting Training Difference

Expert content developed by real practitioners in your industry
⇒ Our focus is to develop ‘practical skills’ - skills you can use the very next day
⇒ Our courses are developed and taught by people who have “been there, done that”
⇒ Our trainers bring real life scenarios/examples to the training making it relevant to the services audience

Experiential learning
⇒ We strongly believe in reinforced learning - that’s why we use case studies in both ILT (in person and online) and On-Demand training
⇒ We design case studies to drive role play sessions intended to allow participants to practice what they are learning
⇒ When possible, case studies are tailored to the customer and services group
⇒ We also offer continuous learning sessions which allow the students to report back on actual field experience 1-2 months after the training

Flexible Delivery Options
RTM Consulting has extensive capabilities to deliver training the way you need it to accommodate specific learning needs, budget requirements or student availability.

On-site: at your location or a mutually agreed venue
On-line: private virtual or public virtual capabilities
On-demand: pre-recorded streaming video available up to 24x7 on any web accessible device
Blended: utilizing more than one delivery method, e.g. online pre-req and then in person

Worldwide Delivery
Our training has been delivered in over 25 countries. Our instructors understand the cultural nuances associated with working in the global economy and are able to tailor their message to their audience.

Customization
For those who need a more tailored approach to training, we offer full life-cycle customization of our courses/modules to ensure maximum return on your training investment.

On-line Test Creation and Administrative Options
Skilled trainers can help recommend, develop and administer testing in support of your particular learning needs, including certifications programs. Our on-line testing capabilities allow convenient access to testing, scoring and reporting.

Student Progress Reporting
Companies utilizing RTM Consulting private virtual and on-demand training have the option of receiving student progress reports on training module completion and test results.

A lot of time, money and effort is spent training consultants on products and technology. But do they really know how to: effectively engage with a client; manage scope creep; effectively handle complaints and issues; and up-sell new opportunities — the soft skills every consultant needs. The Consulting Soft Skills Development training focuses on enhancing the consultative soft skills of consulting and professional services personnel to complement their product, business, and technical knowledge. The six (6) soft skills courses will help your technologists become better consultants.

**Learning Objectives:**

- Building rapport and demonstrate ongoing concern for the customer
- Talking about ideas and solutions in a customer-centric way—talking value and results, less about activities
- Engaging in constructive conversations that end with clear agreements, responsibilities and actions to move forward
- Applying techniques in discussion / presentation that build credibility
- Learn effective communications specific to varying stakeholder groups
- How to manage issues that arise during engagements
- Learn approaches to successfully manage (project) scope
- How to work within and across teams

**Who Should Attend:**

- Consultants / PS Personnel
- Other Technical Services Personnel
- Practice Leads / Managers

Logistics:

The six (6) courses are modular and can be customized to meet your specific need and budget. Time commitment can range from one (1) hour for an individual course on-demand to 3 days of content for all six (6) courses combined with case studies. Delivery methods can be combined to suit the needs of the audience.

Course Highlights:

**Role & Dynamics of a Consultant**

- Defines the various roles a consultant plays throughout an engagement
- Evaluates client stakeholders and provides tools on how to manage various types of stakeholders
- Practical tips and techniques on how to become the ‘Trusted Advisor’ to your customers

**Communication Strategy & Tactics**

- Effective communications techniques, written and verbal, good listening skills, developing and delivering key messages
- Learn tools and techniques for communicating various types of information through the different phases of an engagement
- How to run effective meetings and facilitate workshops

**Scope & Issue Management**

- Provides tools and techniques for managing scope in various environments (e.g., T&M vs. Fixed Bid)
- Discusses difficult scope management situations and educates consultants on how to avoid saying “yes” without really saying “no”
- Delivers tools and techniques for communicating and managing issues and maintaining client satisfaction

**Identifying & Capturing Value**

- Overcome the fear technical resources often have with “up-selling”
- Define how and where to look for opportunities
- Developing and communicating value propositions, focusing more on outcomes
A lot of time, money and effort is spent training project managers on methodologies. But do they really know how to: effectively engage with a client; manage scope creep; and effectively handle complaints and issues – the soft skills every project manager needs. The Soft Skills for the Project Manager training focuses on enhancing the soft skills of project managers to complement their methodology, business, and technical knowledge.

**Learning Objectives:**

- Define the role and responsibility of a project manager
- Explain how to develop and deliver key messages and decide what to communicate and to whom
- Define tools and techniques for communicating various types of information
- Apply communication skills for more effective issue management
- Demonstrate why scope definition is critical
- Apply scope management techniques

**Who Should Attend:**

- Project Coordinators
- Project Managers
- Project Team Leads

**Logistics:**

The three (3) courses are modular and can be customized to meet your specific need and budget. Time commitment can range from one (1) hour for an individual course on-demand to one (1) day for all three courses combined with case studies. Delivery methods can be combined to be suit the needs of the audience.

**Course Highlights:**

**Role & Dynamics of a Project Manager**

- Defines the role and responsibility of a project manager; explores responsibility and authority
- Discusses behaviors of a successful project manager
- Provides insights and techniques for meeting management

**Communication Strategy & Tactics**

- Discusses what to communicate to and to whom
- Develop and communicate key messages
- Delivers tools and techniques for how to communicate issues and risks effectively

**Scope & Change Management**

- Effective practices for scope management
- Managing change and its relationship to scope management
- Tying concepts of communication and tools for managing scope and change processes

Poor project execution is a leading driver of services margin erosion and poor customer satisfaction. Project Managers continually look to enhance their project management skills and drive successful delivery. The Project Management Workshop is specialized PM training for the technology and software industries. The curriculum is designed to reinforce and improve good PM discipline and teach proven, practical aspects of sound project management to achieve breakthrough results and customer satisfaction.

**Learning Objectives:**
- Define the behaviors and attributes that are characteristic of a successful project manager
- Explain project management responsibilities
- Apply the project management responsibilities in practice

**Who Should Attend:**
- Project Managers
- Program Managers
- Project Team Leads

**Logistics:**
This is a one (1) day course. The training can be a classroom led or virtual interactive session with group discussion and individual exercises led by a qualified RTM Consulting instructor.

**Course Highlights:**
**Role & Dynamics of a Project Manager**
- Expectations of a project manager
- The importance of project authority
- Project vs. Program management
- Importance of leveraging project support

**Behaviors of an Effective Project Manager**
- Key management behaviors
- Leadership, problem solving, communication, navigating difficult situations and managing expectations

**Project Management Responsibilities**
- Review the five PM process groups
- Review project management responsibilities in the ten PMI knowledge areas
- Review concepts and practical application of the concepts in all knowledge areas

**Closing Projects**
- Identifying opportunities
- Customer satisfaction
- Lessons learned
Making the transition from a delivery expert to a delivery manager role is not always easy. Most companies’ Human Resources departments help with the vital aspects of people management (hiring, firing, compensation, etc.), but few deal with equipping a new manager with the proper skills necessary for effective execution of the operational aspects of delivery management. This intensive course will prepare your new delivery manager to hit the ground running and feel confident in their ability to help manage your projects on-time and on-budget.

**Learning Objectives:**

- Learn the critical aspects and success factors for delivery managers
- Understand how to transition from the delivery ‘doer’ to the delivery leader
- Understand how to build better collaboration with your sales team, and the critical touch-points that mean the difference between success and failure for project handoffs and client satisfaction
- Review the fundamentals of resource and project/portfolio management
- Learn practical techniques for managing/governing projects and the key metrics common to the PS industry today including dashboard management
- Learn the soft skills necessary for you and your delivery team to be more effective in client interactions and managing expectations

**Who Should Attend:**

- First time delivery managers
- Recently and newly assigned delivery managers
- Delivery managers wanting/needling a refresher course on delivery management

**Logistics:**

This course is comprised of six and a half (6.5) hours of on-demand online pre-requisite training and two (2) days of in-class study led by a qualified RTMC instructor. A post course mentoring option is available—two hours/month for three months delivered remotely by RTMC delivery management experts.

**Course Highlights:**

**Consulting Soft Skills (on-demand pre-requisites)**

**Intro to Role of the Delivery Manager**

**Sales/Opportunity Management**

⇒ Sales communications
⇒ Proposal development and SOW writing

**Resource Management Fundamentals**

⇒ Centralized vs. decentralized models
  ◊ Skills management/planning
  ◊ Resource planning/scoping
  ◊ Forecasting

**Project Management Fundamentals**

⇒ Project execution basics
  ◊ Project scoping/budgets
  ◊ Scope/risk/issue management
  ◊ Partner integration
⇒ Managing large vs. smaller projects
⇒ Portfolio (vs. project) management

**Governance and Continuous Improvement Techniques**

Managing the Transition from Doer to Manager

Selling services is different than selling a product. This course helps its participants understand the differences and provides the insight, context and tools to become more successful at selling services. This course also assists delivery leaders making the transition from pure delivery roles to ones that involve sales and business development. The course identifies the basics of building stronger and more valued customer relationships, and focuses on addressing their goals, problems and needs. The course will enable its participants to more effectively identify, propose and close more services opportunities.

Learning Objectives:
- Describe how to sell consulting and professional services
- Develop stronger customer relationships and formulate a better understanding of their needs
- Explain what it means and how to sell value
- Develop better mechanics in identifying, proposing and closing services sales opportunities

Who Should Attend:
- Sales Representatives (with Services Sales responsibility)
- Delivery/Engagement Leaders and Managers

Logistics:
This is a one (1) day course. The training can be a classroom led or virtual interactive session with group discussion and individual exercises led by a qualified RTM Consulting instructor.

Course Highlights:
Role of a Services Salesperson
- Basics of the role - define what makes a successful services salesperson
- Understand stakeholder management and managing different client resources in the sales process
- How to develop trusted advisor relationships with your client stakeholders
- Time management and prioritization

Identifying and Selling Value
- Techniques for identifying your client’s goals, problems and needs
- The value proposition: what is it and why is it important
- Identifying the value drivers of your client

Advanced Selling Techniques
- Conditioning the customer to the offer
- Constructing and communicating the value proposition
- How to structure and position your proposal
- Closing the deal

Handling Objections to Services Deals
- Importance of pre-call objection handling
- Effective questioning and listening
- Objective handling techniques
- Understanding how to leverage different deal structures

The Statement of Work (SOW) sets the foundation for the scope, financial terms (payment terms, etc.) and delivery terms for your project. SOWs with incomplete or inaccurate details can often result in tension and conflict within delivery teams, contribute to unsatisfied customers, and possibly introduce potential legal and/or financial risks. Poorly written SOWs, containing implicit terms and ambiguous scope, set a project up to fail. SOWs require a strong process for development, approval and governance. The SOW writing course will provide your team with the knowledge, tools, and confidence to write full scope, detailed SOWs and ensure more successful project delivery.

**Learning Objectives:**

- Understand the necessary elements of a solid Statement of Work.
- Acquire the knowledge and tools to help write a successful statement of work.
- Translate how a strong statement of work leads to successful solution delivery.
- Learn the potential pitfalls of SOW writing and how to avoid them.
- Gain knowledge of best practices around SOW writing and governance.

**Who Should Attend:**

- Project and Program Managers
- Project Coordinators
- Services Sales
- Resources responsible for SOW creation

RTM Consulting, Inc.
Call or email for more information and pricing

**Logistics:**

The course is customizable and can range from a 1/2 day (training only) to one (1) full day with the optional SOW practice workshop. The course can be classroom led or virtual interactive session. In addition to the SOW practice workshop, there is an add-on post class SOW review available. Training, workshop and SOW review are led by a qualified RTM Consulting Instructor.

**Course Highlights:**

**Statement of Work Fundamentals**
- Purpose of the SOW
- SOW Key components
- Scope Impact
- Legal Perspectives

**Estimating and Pricing**
- Estimating concepts/perspectives
- Fixed Fee vs. T&M vs. NTE (not to exceed) pricing concepts
- Cost Plus vs. Value Based pricing concepts
- Revenue recognition/VSOE concepts

**SOW Assembly and Governance**
- Using Templates
- SOW Development Process
- Best Practices

**Optional Course Add-Ons**
- Workshop - review company specific SOWs, provide feedback and best practices
- Customization – incorporate company specific SOW processes, templates and governance practices
- SOW Review - review of actual SOW written by participants following the class, critique and specific feedback for areas to correct/review
Not only are field services executives challenged with reducing costs while maintaining services levels, they are also tasked with ongoing process improvement initiatives such as better parts management, first call resolution, and vehicle fleet management. Getting to tactical results remains a priority while identifying strategic changes needed to be competitive long term is often a difficult balancing act for field services teams. Variability reduction processes are a proven method for improving field service performance tactically while also supporting a systematic approach to continuous improvement. This course exposes field services personnel to variability reduction processes which can be applied to virtually any field services performance metric. Using Lean Six Sigma techniques, this course will help jumpstart your process improvement initiatives.

Learning Objectives:

- Understand why you should be thinking about variability reduction as part of your ongoing process improvement initiatives
- Learn how Lean Six Sigma principles can support process improvement in Field Services’ metrics results including first visit resolution, parts management, vehicle fleet management and more
- Understand how variability reduction leads to greater customer satisfaction and retention, lower costs and overall better field service results

Who Should Attend:

- Support/Field Services Techs
- Support/Field Services Managers
- Support/Field Services Operations

Services providers are constantly being challenged to provide the right resources at the right place at the right time to maximize margins and project performance. Over the next decade, effectively and efficiently sourcing and managing resources will be the new high water mark for the industry. At the same time, reliable resource management experts who follow a proven process discipline are in short supply. This first-of-its-kind professional certification program is specifically designed for promoting and supporting competency development for Resource Management professionals.

**Learning Objectives:**

- Understand modern and practical resource management techniques and stay current with industry best practices.
- Review and practice the Global Resource Management (GRM) methodology which underpins Just-in-Time Resourcing® (JITR), RTM Consulting’s brand of human capital management solutions, helping your company facilitate getting the right person in the right place at the right time.
- Understand how JITR can alleviate the pressures services organizations face - from billable utilization to project overruns to employee development.

**Who Should Attend:**

- People who work as or lead Resource Managers or perform resource management related tasks
- Operations or People Managers who need a stronger knowledge of resource management
- People wishing to update their current resource management knowledge with industry accepted best practices
- People wanting to break into the competitive and growing Resource Management profession

**Logistics:**

This is a comprehensive program including prerequisite study material, a three (3) day onsite or six (6) week online program including interactive class sessions and practical exercises led by a qualified RTM Consulting experts, and certification testing.

**Certification Process Overview:**

Apply for Certification / Complete Pre-reqs
=> Apply online via RTMCs LMS
=> RTMC will review application and notify of eligibility
=> Complete required pre-reading/exercises

Attend Certification Program
=> In Person (3 days) or Online (6 weeks)
=> Reference materials to help put the learning into practice

Take Exam
=> Certification exam conducted at conclusion of program
=> Exam results will be immediate

Recertification Process
=> Certification will be active for two years
=> 20 Professional Certification Units (PCUs) needed for recertification
=> Recertification can also be achieved by retaking exam

**Eligibility Requirements:**

Must Meet Educational and Professional Experience Requirements*
=> High school diploma / any associates degree and minimum four years of RM or PS experience
=> Any bachelor’s or master's degree and minimum two years of RM or PS experience

*Full requirements list is located in the RMCP® Handbook

This course covers the content required to approach either the CAPM® or PMP® certification exam. The course is designed to provide participants with exposure to project management best practices and a full understanding of the knowledge areas and process groups defined in the PMBOK® Guide. The content discusses terminology, tools and techniques and extends to provide a deeper perspective, facilitating an understanding of the reasons for their use as well as the benefits of doing so.

Learning Objectives:

- Navigate the PMBOK® Guide and learn the difference between knowledge areas and process groups, and recognize the inputs and outputs associated with each of the PMI processes
- Use and create the deliverables associated with Project Integration Management including planning for success
- Plan for and manage the Project Stakeholder Management process, define and manage Project Scope effectively, produce estimates and develop a schedule to properly undertake Project Time Management, create a budget and measure performance to implement Project Cost Management
- Understand Project Quality Management, provide effective and appropriate communication within project management, understand how organizations and projects are structured, understand Project Procurement Management, evaluate the contexts and environments in which projects can be delivered, understand governance of project management and the use of structured methodologies

Logistics:

⇒ Classroom – five days, 36 Professional Development Units (PDUs)
⇒ Online – 36 hours, 36 Professional Development Units (PDUs)
⇒ PMP® / CAPM® Exam Prep course available. Contact RTMC for details.

Overview:

⇒ The CAPM® and PMP® credentials are recognized across the world and demonstrate that credential holders have the experience, education and competency to lead and direct projects
⇒ Through the use of an appropriate case study during the course, students will be able to apply what they learn, making use of the theory in a practical sense which allows for more effective learning and greater likelihood of implementation and improvement in the workplace
⇒ Project management professionals will benefit from the perspective gained on this course whether they intend to take the PMI exam or not

Who Should Attend:

⇒ Existing PMs looking for best practices as defined by the PMI and are looking to take the CAPM® or PMP® exams
⇒ Project team members who wish to better understand the responsibilities and activities involved in project management
⇒ Project team members who wish to progress into a career as a project manager

High performing organizations foster a culture of ongoing learning in their organization. RTM Consulting recognizes that those organizations want to look at training as an overall plan vs. one-time event and has developed a program that addresses the needs of PS organizations while saving both time and money.

**Professional Services Excellence Objectives:**

- Supports a programmatic approach to address the PS area of skills development while understanding the whole view of a student
- Provides the program framework, PS training, and measurement of results practitioners and organizations need

**Why Professional Services Excellence?**

- Holistic/programmatic approach to needs based training for all PS professionals in the organization – no longer just “event-based” training
- Flexible package pricing for consulting, training, measurement and testing
- RTMC consulting support through the duration of the program
- Continuous learning and testing to ensure comprehension and benefit received for investment
- Organization recognition of Excellence in PS – backup to support the value of PS to customers
- Consumption of training/completion of program can be across an extended duration to meet budget, utilization and overall training goals

**The Professional Services Excellence Process:**

- **Baseline and Planning**— working with your organization, we map out and understand current state, skill gaps, key metrics to measure, mapping roles to training plans, state of the business and expected outcomes
- **Training Delivery**— Delivery of focused training designed/aligned to support goals/outcomes and planned roadmap—utilizing the best methods available
- **Continuous Learning**—Specific opportunities to provide coaching and reinforcement of training/learning—e.g. case studies, online assignments, call-in Q&A, etc…
- **Measure, Monitor, and Report**—Utilizing our LMS, we can provide monitoring and reporting of progress through the entire learning path, we provide measurement against original outcomes throughout the training and at program completion

**Who Should Participate:**

The PSE program has training tailored to all resources in an successful PS organization:

- Leaders
- Project Managers
- Delivery Managers
- Operations
- Consultants (engineering and delivery)
- Services Sales
- Services Marketing
SKILLS DEVELOPMENT AND TRAINING CONSULTING

Transform Your Services Business
In the Services industry, two key attributes of success include being: *flexible and adaptable*. RTM Consulting recognizes that there may be certain situations where a standard training offering may not completely address desired learning objectives, or be delivered in a manner supportive of your particular situation. As such, RTMC can work with you to customize and tailor a curriculum to address your specific learning objectives – and time constraints.

**Learning Objectives:**

The learning objectives you have defined may include multiple components or require a deep dive in a particular area. Whatever those objectives may be, RTM Consulting can leverage its full library of skills development curriculums to provide content to address your needs. Where that content does not map exactly to your learning objectives, RTM Consulting can develop new materials to meet your needs.

**The Customized Skills Development Process:**

In developing customized training, RTM Consulting will begin by:

- Collecting and analyzing the learning objectives and mapping those to available training content (including RTMC, client, and commercially available content)
- Reviewing the content with the client for validation and agreement

Then RTMC can: 1) pull from its vast library of training curriculum to provide a base of materials; 2) incorporate pre-defined client and commercially available training materials; and 3) build new content.

**Curriculum Examples:**

RTM Consulting has built a variety of customized training curriculum, including:

1. **Project Management Soft Skills and PMP® Exam Prep** – to help a client’s Project Managers build skills to interact with clients on a more productive manner and address the organization’s desire to have more certified Project Managers

2. **Services Sales Workshop** – to help a client’s Practice Leads more effectively pursue services sales opportunities, RTMC integrated existing and built new curriculum to address the client’s needs

3. **Strategic Executive Workshop** – to educate a client’s non-Services executives on the key market drivers of the Services industry, RTMC developed a custom workshop to provide content on market drivers, organizational constructs and keys to success
Skills development is vital to a healthy services team. Ensuring the right outcomes for your training investment is therefore critical. Organizations that excel in skills development begin the process with skills assessments used to drive training curriculums and plans. RTMC has a proven approach to pinpointing your needs so you can ensure the best outcomes when it comes to skills development.

**Learning Needs Assessment Objectives:**

- Define and document current skills and competencies of existing personnel
- Understand and document current and future skills needs
- Create skills roadmaps and curriculum requirements

**Why Skills Needs Assessments?:**

- Better focus your training investment
- Improve usable skills post-training
- Create more predictable outcomes to training

**The Needs Assessment Process:**

A skilled RTMC consultant will work with your team to understand your situation and define an approach to conducting a skills assessment. Due to the individualized nature of skills needs assessments, these are typically conducted as time and materials consulting projects.

- Examples of how we collect / document current capabilities:
  - Skills testing or surveys
  - Interviews (sampling or for smaller groups all individuals)
  - Job observations (particularly helpful to assess soft skills)
  - Employee feedback from supervisors
  - Self-assessments
  - Other

- Understand from management and others current and future skills needs of the organization
- Map skills needs to existing capabilities to create a skills gap analysis
- Document current and future requirements as input to curriculum and skills development planning
Experience does matter - and not all learning occurs in the classroom. At certain points, all of us can use a little help from someone who has been there, done that. RTM Consulting provides one-on-one and group mentoring to help Executives, Practice Leads, Managers and other personnel across the Service spectrum. This mentoring is intended to provide the recipient with advice, counsel and support on a range of topical areas including: managing a global workforce, effectively selling services, managing a delivery portfolio, running an effective help desk and more. Essentially, if there is an area impacting your achievement of profit, customer satisfaction, employee satisfaction, or other goals, RTMC’s Mentoring may be right for you.

The Mentoring Process:

RTM Consulting:

- Develops an understanding of the particular areas for development through discussions with personnel, their management and other stakeholders (as appropriate)
- Builds and gains agreement with the client to a structured program to address the particular needs – and the logistical requirements – of the personnel being mentored
- Executes the plan and refines (as appropriate)

Who Should Participate:

- Executives
- Managers
- Practice Leads
- Resource Managers
- Project Managers
- Consultants
- Customer Service Managers

RTM Consulting will work with you at the time and place that works best for you. Mentoring can involve in person meetings, teleconferences, web meetings and other methods of interaction. Mentoring can occur at scheduled intervals and on demand.

Mentoring Examples:

Examples of Mentoring that RTM Consulting has delivered include:

⇒ Working with the CEO of an organization with an emerging Services organization to help better understand and put into practice the drivers of profit and success in the Services industry

⇒ Working with the SVP/VP of an enterprise Service organization to optimize their cost structure in the short-run and investing returns to transform services into an engine of growth for the company

⇒ Working with Practice Leads to help the transition from managing client projects to managing a portfolio of engagements, globally distributed personnel and the myriad challenges of working in a matrixed environment

⇒ Working with Project Managers to help manage both: 1) key drivers of project success (time, scope, and quality); as well as 2) the process of using effective communication skills to keep all stakeholders (e.g., project team, client, and internal management) aware and abreast of project performance

⇒ Working with Delivery Managers to better manage overall project performance and service delivery financial performance and execution
